RAVI TEJA KAMARSU

Front-End Developer | Software Engineer

+91-7799289333 | kamarsuraviteja@gmail.com

Kovvur, Andhra Pradesh, India - 534350

PROFESSIONAL SUMMARY

Passionate Front-End Developer with 4+ years of professional experience in designing and developing scalable web applications using Angular, ReactJS, TypeScript, JavaScript, HTML, CSS, and Bootstrap. Proven expertise in coding, programming languages, software engineering, computer science, information technology, and computer engineering. Strong background in building dynamic user interfaces, implementing state management, optimizing UI performance, and creating reusable components. Successfully delivered 15+ software systems, improved application performance by 30%, reduced production defects by 40%, and trained 5+ junior developers. Adept at Agile development, debugging, security systems, object-relational mapping (ORM), GitHub version control, troubleshooting production issues, and delivering measurable business results through innovative and collaborative team environments.

CORE COMPETENCIES

Front-End Development • Software Engineering • Programming Languages • Coding • JavaScript Development • Angular • ReactJS • TypeScript • Node.js • HTML5 • CSS3 • Bootstrap • Tailwind CSS • PrimeNG • Software Systems • Computer Science • Information Technology • Computer Engineering • Agile Development • GitHub Version Control • Object-Relational Mapping (ORM) • Debugging • Security Systems • RESTful APIs • MongoDB • Redux • State Management • Performance Optimization • Unit Testing • UI/UX Implementation • Responsive Design • Problem-Solving • Troubleshooting • Team Collaboration • Training & Mentoring

TECHNICAL SKILLS

Programming Languages & Coding: JavaScript, TypeScript, Node.js

Web Technologies: Angular, ReactJS, HTML5, CSS3, Bootstrap, PrimeNG, Tailwind CSS

Frameworks & Libraries: Redux, Angular Module Federation

Database: MongoDB

Concepts & Methodologies: Object-Relational Mapping (ORM), Debugging, Agile Development, Software Systems, Information Technology, Computer Science, Computer Engineering, Security Systems, RESTful APIs, Micro Frontend Architecture, State Management, Component-Based Architecture, Responsive Design

Tools & Platforms: GitHub Version Control, Unit Testing, Browser-based Debugging

PROFESSIONAL EXPERIENCE

Front-End Developer | Software Engineer

Finsol Consultancy Private Limited, Visakhapatnam, India | *July 2022 – Present*

- Developed and maintained 15+ scalable enterprise web applications using Angular, ReactJS, TypeScript, JavaScript, HTML5, CSS3, and Bootstrap, ensuring adherence to front-end development best practices and coding standards
- Improved application performance by 30% through advanced coding techniques, debugging, UI optimization, and performance tuning of frontend components
- Reduced production defects by 40% using structured debugging methodologies, comprehensive unit testing with Jest and Mocha, and security systems validation

- Increased deployment accuracy by 35% implementing GitHub version control workflows, code reviews, and CI-friendly deployment practices
- Delivered Agile development cycles improving sprint delivery efficiency by 25% through iterative development, daily standups, and sprint planning
- Implemented Redux for state management and integrated RESTful APIs with Angular and React frontends, building reusable UI components for responsive, user-friendly interfaces
- Designed and developed Micro Frontend software architecture using Angular Module Federation for modular, scalable enterprise systems
- Reduced UAT issue leakage by 20% through structured SIT and UAT coordination, comprehensive testing, and defect tracking
- Trained and mentored 5+ junior developers on front-end development, Angular, React, programming languages, coding best practices, GitHub workflows, and debugging techniques
- Coordinated SIT, UAT, and Production releases ensuring zero downtime for 10+ deployments with comprehensive deployment documentation
- Delivered L2 and L3 application support and troubleshooting for production issues, improving client satisfaction score by 30%
- Collaborated with cross-functional teams including BA, UI/UX designers, QA, and backend developers to deliver high-quality, secure, and scalable software solutions
- Implemented cryptographic security measures, role-based access control (RBAC), and secure data-handling techniques for sensitive data protection in enterprise applications
- Optimized UI performance using lazy loading, server-side pagination, and dynamic form components to reduce repetitive code and enhance user experience
- Performed comprehensive code reviews, authored unit tests, analysed technical requirements, and provided effective solutions for complex front-end engineering challenges

KEY PROJECTS

Dynamic Reporting & Analytics Portal

Technologies: Angular, TypeScript, PrimeNG, Bootstrap

- Built a configurable and scalable dynamic reporting platform designed to generate real-time operational, financial, and analytical reports for enterprise users
- Developed system supporting dynamic filters, role-based access, and multiple visualization formats to enable data-driven decision-making
- Led front-end development ensuring seamless integration with backend workflows and RESTful APIs
- Designed and implemented configurable report templates supporting tables, charts, and pivot views for flexible data presentation
- Built role-based dashboards with access control for Admins, Managers, and Business Users ensuring data security and appropriate visibility
- Optimized performance for large datasets using lazy loading and server-side pagination techniques
- Conducted unit testing, UAT support, production deployment, and post-release maintenance ensuring system stability and user satisfaction

Commercial Corporate Cards Portal (AFS-GIB, ALSALAM, Dolfino-In-house)

Technologies: Angular, TypeScript, PrimeNG, Bootstrap

- Built secure self-service corporate card management platform for 500+ users across multiple banks serving AFS Admins, Bank Ops, Corporate Admins, Cost Center Admins, and Card Users

- Led front-end development ensuring seamless integration with backend workflows and RESTful APIs
- Implemented comprehensive security systems with role-based access control, cryptographic data protection, and Maker-Checker workflows for high-security transactions
- Improved transaction compliance accuracy by 30% through robust validation logic and real-time transaction controls
- Developed features including card activation, PIN management, balance enquiry, statement download, and transaction monitoring
- Built role-based components, dashboards, and transaction modules ensuring secure and user-friendly interfaces
- Handled unit testing, UAT, deployment, and post-production support ensuring zero downtime and high system reliability

Knowledge Hub Portal (In-house Enterprise System)

Technologies: Angular, Node.js, Bootstrap, MongoDB

- Developed enterprise ticket tracking and management system processing 2,000+ records per month for UAT, SIT, and Production environments
- Improved ticket resolution turnaround time by 40% through optimized workflows and streamlined Angular UI modules for ticket lifecycle management
- Designed Micro Frontend architecture using Angular Module Federation for scalable, modular enterprise systems
- Developed Angular UI modules for ticket lifecycle management including creation, updates, filtering, and environment-based segregation
- Implemented bulk ticket upload via Excel, export functionality to Excel and PDF formats, and comprehensive filtering capabilities
- Built Maker-Checker logic and role-based access controls ensuring secure ticket operations and data visibility
- Handled unit testing, UAT coordination, production deployment, and end-to-end feature ownership

Hospital Management System (Vaidyo.in)

Technologies: JavaScript, Bootstrap

- Developed comprehensive hospital ERP system UI covering Hospital Administration, Outpatient/Inpatient Management, Billing, Laboratory, Investigations, Pharmacy, Stores, and Electronic Medical Records (EMR)
- Developed UI modules for billing, patient management, and inventory workflows using JavaScript and Bootstrap
- Collaborated with clients to translate hospital processes into functional UI screens ensuring user-friendly interfaces
- Performed debugging, testing, and production support resolving 100+ real-time production issues
- Wrote unit test cases and participated in code reviews ensuring code quality and maintainability

EDUCATION

Bachelor of Technology (B. Tech) in Electronics & Communication Engineering (ECE)

Pragati Engineering College, JNTU Kakinada | February 2021

Diploma in Electronics & Communication Engineering (DECE)

Col. DS Raju Polytechnic | May 2016

PROFESSIONAL SKILLS

Problem-Solving Skills • Analytical Thinking • Troubleshooting • Communication Skills • Team Collaboration • Cross-Functional Coordination • Training & Mentoring • Code Reviews • Work Well Under Pressure • Client Relationship Management • Requirements Analysis • Technical Documentation • Time Management • Attention to Detail
